1. Introduction

This document provides the overall testing strategy and approach required to ensure that the requirements of OrangeHRM are tested adequately and that the required level of quality and reliability of the software deliverables is attained.

2. Objectives

The goal of this test plan is to identify and eliminate defects in the OrangeHRM system to ensure a stable and user-friendly application. This will be achieved by validating that all functional requirements are met as defined in the SRS and Epics documentation.

3. Test Approach

The project is based on Functional Testing. All tests will be performed manually with daily iterations at the end of each day.

4. Scope

4.1 In Scope

My Info Module (ESS View)

- **Personal Details** (view only - Employee ID, Driver License No, Date of Birth)
- **Photograph** (upload - max 1MB, formats: jpg, png, gif)
- **Contact Details** (edit - address, telephone, email)
- **Emergency Contacts** (add, edit, delete, attachment)
- **Dependents** (add, edit, delete, attachment)
- **Immigration** (add, edit, delete - Passport/Visa details, attachment)
- **Job** (view only - Job Title, Employment Status, Location, Contract dates)
- **Salary** (view only - hidden from ESS, accessible to Admin only)
- **Report To** (view only - supervisors and subordinates)
- **Qualifications** - Work Experience, Education, Skills, Languages, Licenses, Memberships

Admin Module

- **User Management:**
 1. Create, edit, delete, search users
 2. Assign roles (Admin/ESS)
 3. Enable/disable accounts
- **Job Module:** Job Titles, Pay Grades, Employment Status, Job Categories, Work Shifts (add, edit, delete)
- **Organization Module:** General Information, Locations, Structure/Hierarchy
- **Qualifications Configuration:** Skills, Education Levels, License Types, Languages, Memberships (add, edit, delete)

4.2 Out of Scope

- UI / visual design and layout testing
- API testing
- Performance and load testing
- Backup and recovery testing
- Localization and language settings

5. Test Deliverables

- Test Plan (this document)
- Test Scenarios and Test Cases
- Requirements Traceability Matrix (RTM)
- Test Execution Report
- Bug Report
- Test Summary Report

6. Schedule

Task	Duration	Start Date	End Date
Test Case Design	2 Day	09-March-26	10-March-26
Test Data Preparation	1 Day	09-March-26	09-March-26
Test Execution	2 Day	10-March-26	11-March-26
Bug Report	1 Day	11-March-26	11-March-26
RTM	1 Day	11-March-26	11-March-26
Test Summary Report	1 Day	12-March-26	12-March-26

7. Roles & Responsibilities

Staff Member	Role	Responsibilities
Mamoun Suboh	Project Manager	1. Assign tasks 2. Review test activities 3. Schedule project timeline
Afnan Kharoof	QA Lead	1. Guide team 2. Conduct daily meetings 3. Resolve ambiguities
Abdullah Muhaisen Abdulhakeem Sakhel Qusay Terawi Hasan Aburajab	QA Team	1. Requirements Analysis 2. Create Epic story and User stories 3. Prepare test plan 4. Write and execute test cases 5. Create bug reports 6. Create RTM 7. Prepare Test Summary Report

8. Entry & Exit Criteria

8.1 Entry Criteria

- Test environment accessible (demo URL live)
- Test credentials available (Admin: admin/admin123, ESS: John Doe/John@123)
- Test cases prepared and reviewed
- No blocking defects in the system

8.2 Exit Criteria

- All planned functional test cases executed
- No critical or major defects remaining open
- Test summary report approved

9. Resources & Environment

9.1 Testing Tools

- **Test case management:** Excel / Google Sheets
- **Bug tracking:** Trello

9.2 Test Environment

- **Platform:** Web
- **URL:** <https://opensource-demo.orangehrmlive.com/web/index.php/auth/login>
- **OS:** Windows 10
- **Browsers:** Chrome (latest), Firefox (latest), Microsoft Edge (latest)
- **Admin credentials:** Username - Admin | Password - admin123
- **ESS credentials:** Username - John Doe | Password - John@123

10. Risk Management

Risk	Mitigation
Requirements not clearly defined	1. Re-review SRS document file 2. Raise ambiguities to QA Lead or PM
Demo environment instability or data resets	1. Record test evidence immediately 2. Re-create test data at the start of each session
Shared environment - data from other testers	1. Use unique identifiable test data names
Incomplete test coverage due to time constraints	1. Prioritize critical and high-severity test cases first

11. Approval

Name	Role	Approval Status	Date
Mamoun Suboh	Project Manager	Approved	06-March-26
Afnan Kharoof	QA Lead	Approved	06-March-26
Abdullah Muhaisen	QA Engineer	Approved	09-March-26
Abdulhakeem Sakhel	QA Engineer	Approved	09-March-26
Qusay Terawi	QA Engineer	Approved	09-March-26
Hasan Aburajab	QA Engineer	Approved	09-March-26
